

## Politics of On-Site Electronic Voting

### Panel Chairs:

- Giulia Sandri (Catholic University of Lille) [giulia.sandri@univ-catholille.fr](mailto:giulia.sandri@univ-catholille.fr)
- Régis Dandoy (Ghent University)

### Abstract

On-site electronic voting is currently used in some of the world's largest democracies and is considered a valid option to replace paper-based voting in others. But little is known about the impact of e-voting systems on different aspects of electoral processes, particularly on party and candidates' behavior or voters' behavior. This panel seeks to gather papers that consist of detailed overviews of e-voting processes as well as papers comparing cases using different technologies. Comparative papers are preferred. Yet, the panel also welcomes case studies that analyze original cases and/or new electoral processes and trials or that rely on novel databases and/or methods.

To submit a Paper proposal, you need to create a MyECPR account (if you don't already have one) and send the following information to [Giulia Sandri](#) by **10**

### February:

- your name, academic affiliation and email address
- a title for your paper
- an abstract of up to 500 words
- 3-8 keywords
